Breeder's Address: 33425 Hellroaring Rd, Polson, Montana 59860

CONDITIONS OF SALE:

Hellroaring Kennels goes to great lengths to produce healthy sound puppies. Puppies bred at Hellroaring carry a two year guarantee against any genetic health defects. It is impossible to predict that every animal produced will be free of all health problems, that is why we offer this guarantee.

We guarantee this puppy is in good health, to the best of our knowledge, at the time of sale. To keep this warranty valid, the dog must be examined by a licensed veterinarian within 72 hours (excluding Saturday and Sunday) of receipt of the puppy. If the veterinarian finds the dog to be genetically imperfect or have severe health problems, this dog must be returned immediately to the breeder, (within 48 hours) accompanied by a certificate of statement from the veterinarian for a replacement puppy.

If a replacement puppy is not available at the time of the return, one will be made available as soon as reasonable. There are absolutely NO REFUNDS. All veterinary expenses are the responsibility of the BUYER. Said puppy is guaranteed against genetic defects for up to (2) two years.

No guarantee is made as to disposition or conformation. It is impossible to accurately determine the EXACT adult size of any puppy therefore; we cannot give a size guarantee. Size estimate is based on the size of the parents. The BREEDER makes no guarantees or warranties regarding the puppy's size.

If within a (2) two year period, should this dog be diagnosed with any genetic disease, a replacement puppy will be given when available, as long as Hellroaring is still breeding. If the buyer decides he or she cannot keep this puppy for any reason the puppy will be returned to Hellroaring, unless both parties agree otherwise. This puppy will never be sold to a pet store or puppy mill.

This dog has been wormed and has received proper immunizations:

Date: _____ Recieved: _____

Date: _____ Recieved: _____

We do not guarantee against Giardia or Cocci since these are very contagious and common parasites. We do our best to prevent infection but sometimes it is impossible to completely irradiate these two parasites before puppy goes to his new home. These parasites can live dormant and go unnoticed in the puppy's GI tract and can sometimes be brought on by the stress of leaving the kennel, its mother and littermates.

I have read, understand and agree to these terms and limitations. I consider this to be a legally binding Document.
